PDF Comparator

This tool compares two PDF files and highlights the differences. [Output Example](#)

1. How to Launch the PDF Comparator

1.1 Launch from Executable File (Recommended)

1. Download the [executable file](#).
2. Double-click the downloaded [PDF比較ツール.exe](#) to launch it.

1.2 Launch from Source Code (Not Recommended)

1. Install Python 3.12 or later.
2. Install required libraries.

```
$ pip install pdf2image pillow
```

3. Clone the repository.

```
$ git clone git@github.com:kouki-0926/PDF_Comparator.git
```

4. Run main.py.

```
$ python PDF_Comparator/main.py
```

2. Usage

1. Select two PDF files you want to compare.
2. Click the “PDF比較実行” button.

3. A PDF file with differences highlighted will be output.

3. How to Create an Executable File

```
$ pip install pyinstaller  
$ pyinstaller PDF_Comparator/main.py --name="PDF比較ツール" --icon=img/icon.png --  
onefile --windowed
```
